

CipherID Network

Whitepaper v1.0 (Concept Project)

Scalable Layer-1 Infrastructure for Modern Web3

Executive Summary

CipherID Network is a conceptual Layer-1 blockchain for scalable decentralized applications and an open developer ecosystem.

Vision

Build a reliable, high-performance blockchain platform for modern Web3 innovation.

Mission

Support developers with transparent governance, efficient infrastructure and community-driven growth.

Core Features

Layer-1 Architecture, Fast Block Finality, Low Fees, Smart Contracts, Community Governance.

Native Token

CPID is used for transaction fees, staking, governance and ecosystem participation.

Roadmap

Phase 1 Branding

Phase 2 Testnet

Phase 3 Ecosystem

Phase 4 Governance

Phase 5 Future Expansion

Technical Specifications

Network	CipherID Network
Ticker	CPID
Consensus	Proof of Stake (Concept)
Block Time	10 Seconds
Genesis Supply	100,000,000
Max Supply	1,000,000,000
Decimals	18
